

# MORLEY

*Precision Measurement Solutions for Manufacturers*

## Press Release

### **Morley Machine Tool Alignment announces the opening of its new \$1.25 million Facility in Milton, WA.**

Morley recently purchased and renovated the facility to facilitate continued growth and expansion of its global manufacturing support services business.

**Milton, WA, December 18, 2009:** Morley purchased the facility in May 2009, and recently moved its operations from Puyallup, WA to Milton. Morley uses specialty lasers to provide machine tool alignment and calibration services to manufacturers. The new facility will allow Morley to expand its machine tool rebuilding business and add to its staff. Morley provides services to manufacturers throughout the United States, Canada, and Asia. Morley experienced a 10% growth in business in 2009 and expects growth to accelerate in 2010.

Morley provides precision measurement services for large projects such as aligning the tooling for 50-ton propeller shafts on ice breakers or the infrastructure for the new Sun Valley Amphitheater; as well as alignment and calibration for manufacturers of small medical devices.

Morley is holding a holiday open house with food and refreshments from 12 noon to 6:30pm for its local customers, city officials, and the press.
